

Good morning,

I am writing as a concerned citizen regarding the proposed bills SB184 and HB5262. I am 100% opposed to mass mail in voting, as our state DOES NOT have the safeguards in place to determine who actually completed each ballot that is sent in, leading to the potential for widespread voter fraud. Mail in ballots should only be allowed for VALID reasons, such as sickness of an individual, absence from town on voting day, or physical disability which would prevent a voter from getting to the polls. If people can stand in line (while sick) to get Covid tested, they can stand in line to vote. This charade needs to end. There is no emergency and there is absolutely no need for these bills.

Thank you.
